

# THE CAMDEN

CUT BY: AKOS  
MODEL: JAMES

1. Prepare the hair using **Charge Up Shampoo** from Bed Head for Men.

2. Take a slightly curved horseshoe section from the high recession towards the back of the head.

3. Start the cut at the sides. Work with diagonal back sections, comb and elevate the hair to 90° and blunt cut following the head shape.

4. Continue the technique consistently until the center back is reached.

5A. Note the hand and body position and repeat the same technique on the opposite side of the head.

5B.

5C.

5D.

6. Now take a radial division at the top.

7A. Continue working with pivoting sections around the crown. Comb the hair to 90° elevate to 45° and blunt cut squarely to the head shape to build weight to the crown area.

7B.

8A. From the crown forward take a center vertical section. Use the guide from the crown and remove weight by point cutting, following the head shape.

8B.

9. At the sides in front of the ear work with pivoting sections. Following the guide from the back and the top create a slight disconnection to the underneath by point cutting squarely to the head shape.

10. Over-direct each section back to it's previous to maintain length and weight at the front hairline.

11. Before the styling apply **Pure Texture Molding Paste** to give support and control the natural movement of the hair.

12. Blow dry the hair forward with the hands.

13. Personalize the shape and remove weight using the thinning shears.

14A. Finish the cut using **Matte Separation Wax** to give definition to the texture.

14B.
